FRANCIS TUAN STAGE PLAN

FRONT

The mixing console should be equipped with a reverb, also there should be four monitor (aux) lines for the in-ear monitors (Francis, Ajda) and mixers (Gabryisia, Paweł).

To perform a comfortable soundcheck we need at least one hour, not counting the instruments set-up on the stage.

The organizer should provide the band with cold drinks and/or water on stage.

In case of an outdoor concert there should be a separate backstage equipped with a mirror, electric sockets and a toilet.

After the concert the power supply cannot be turned off as long as the band doesn't switch off their instruments first.

We're open for any technical solutions by prior arrangement. In case of any questions, feel free to use the contact info below.
